

## People Search Aggregation

The **People Search Results** can be further analyzed using the results **Aggregation** tool in Julep.

### How to use the Aggregation Tool

1. Enter your [People Search](#) filter criteria and click **Run**.
2. Your results will appear on the **Results** tab.
3. Click the **Aggregation** tab to further analyze.
4. By default, the results will aggregate the total number of people records based on your search.

	# Records
Total	136

5. Click in the **Group By** field to select further aggregation criteria. Filter field options include:
  - People Type
  - State
6. Select the field you would like to aggregate by to see results. You can select multiple.
7. Results will appear onscreen.
  - Click **Export** while in the **Aggregation** tab to export your aggregation results. Go back to the **Results** tab to export your full list of records.

People Search 

Filters Output Fields Result Aggregation

Group By:   Then By:

	# Records
Individual	134
Corporation Non-matching	2

**NOTE:** [Saved Searches](#) will also save Aggregation settings
