

The Julep **Event Dashboard** provides an overview of event data by displaying total amounts, counts, a map of where events are located, and summary information on top events, fundraising codes, and locations.

- There is a **Dashboard Navigation Bar** at the top right corner of the page where you can access:
 - **Event Search**
 - **Import Invitees**
 - **People Settings**

- Click on the information shown on **cards** to generate a list that consists of that count or total amount displayed on the card. For example, if you click on the **Total Raised** amount or **Events Not Linked to a Source Code**, they will run the related **Money** or **Event Search** that consists of those records that make up that number.

- Click the arrows on the bottom card to cycle through total \$ by date range.

- The one **Dashboard Action Button** available is the **Add Event** button.
- The **graphs** will provide additional information related to event goals being met or not, event invitee statuses, and payment types for event contributions. Also, there are total amounts raised in events broken down by date ranges.

- The **top 5 lists** provide summary information on upcoming events, top events, top source codes, top initiatives, and locations that show how and where you are raising the most money through events.
- The last two lists on the Event Dashboard, are the **Event Reports** and **Fundraising Reports** that you can run by clicking the report's title. If you click the  button in either section, a list of all Event or Fundraising reports will be displayed.
